

DWB software solutions - open source and free for download

Dagmar Triebel, Tanja Weibulat, Markus Weiss, Andrea Grigat, Michaela Harbeck

DWB – a set of software tools

Diversity Workbench (DWB) is a suite of tools

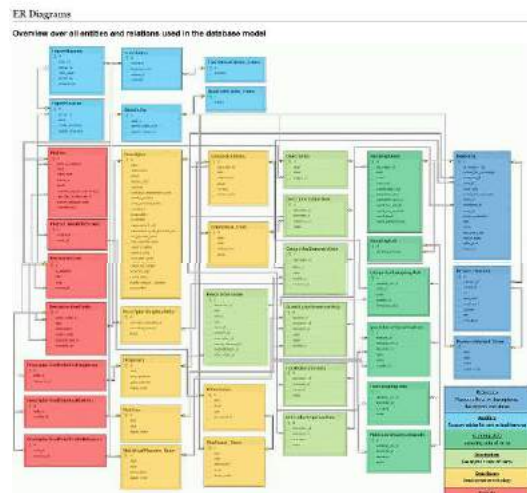

- to manage bio- and geodiversity data
- to address data generation, data management, quality assurance and basic data analysis issues

DiversityDescriptions Information Model (version 3.0.15, 11 July 2016)

Version:	3.0.15, 11 July 2016
License:	CC-BY-NC-ND 4.0
Author:	A. Hagedorn, A. Pflanz, A. Lutz, G. Scharf, R. D. Thiele (2014) DiversityDescriptions Information Model (version 3.0.15) http://www.diversityworkbench.org
Notes:	This model is currently under development. It is not yet ready for use in production. It is not yet ready for use in production. It is not yet ready for use in production.

divd Database Scheme

This information model is based on the divd database scheme with each single database and data column reference to the concept by its own name and persistent URL.

DWB – a set of software tools

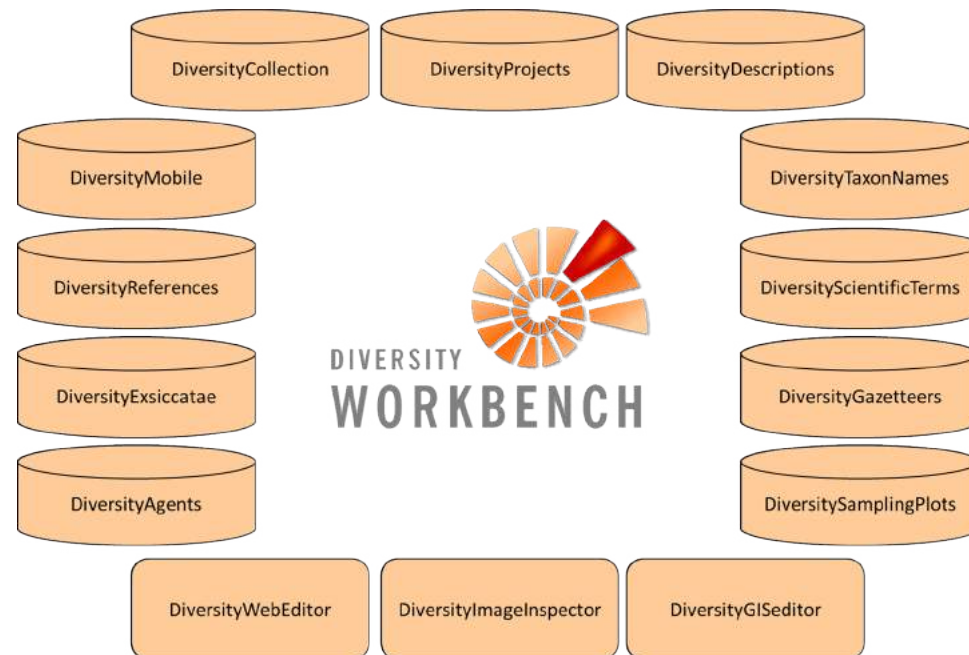

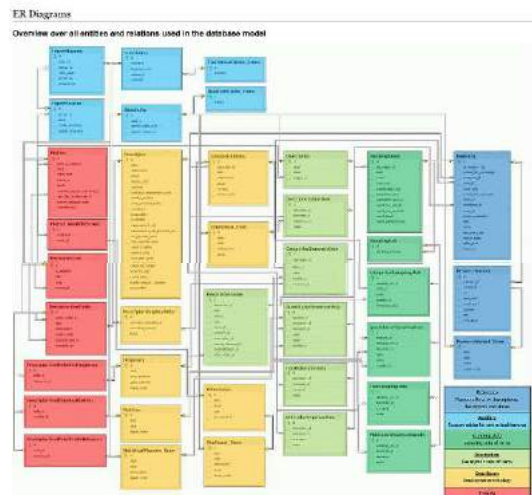

- Relational SQL databases, used stand alone or in a (internal) server/ cloud network
- Software design is adapted to data domain-specific demands and user scenarios, including those of scientific collections, ecological and descriptive sciences

DiversityDescriptions Information Model (version 3.0.15, 11 July 2016)

Version:	3.0.15, 11 July 2016
License:	CC BY-NC-ND 4.0
Author:	A. Högström, A. Frank, A. Lind, G. Svanbäck, D. Thaler (2014) DiversityDescriptions Information Model (version 3.0.15) http://www.diversityworkbench.org
Notes:	This model is currently used in the DDB Core and Knowledge of Life (DDB Core) project. It is designed to be used for biodiversity data and is not intended to be used for other purposes.

divd Database Scheme
This information model is available as a database scheme with each table and data column related to a concept by its own table and persistent URL.

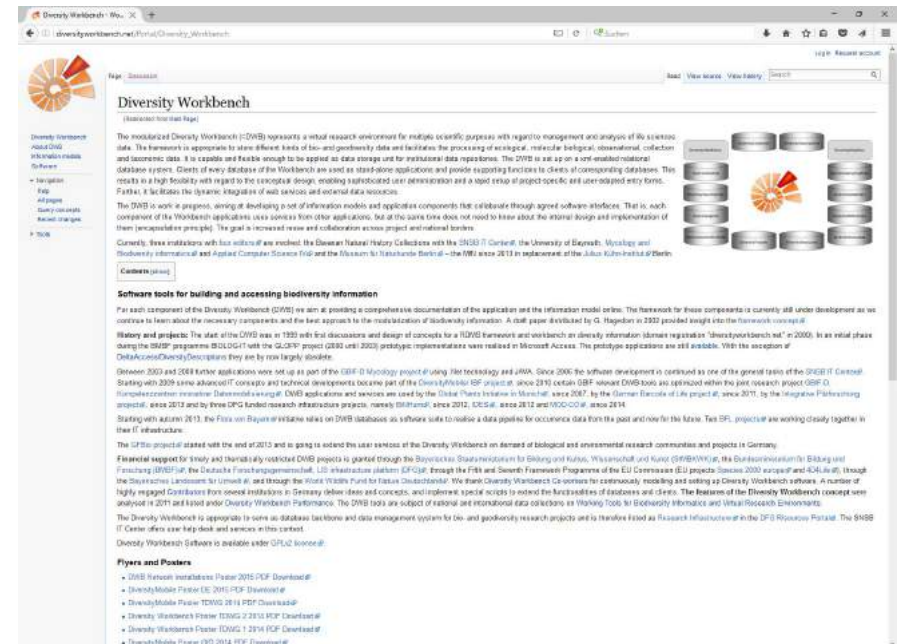

DWB – Agile Software-Development

Since 20 years

- four software developers at SNSB, support from BT, MfN and other teams
- software is free for download under **www.diversityworkbench.net**
- open source (more than two mio code lines)
- software design, data models and ER-schemata are published (OA)
- agile software development is done on user demand and with a number of engaged users involved
- workshops since 15 years

DWB – Data management

Focus: Providing structured and FAIR data

- Target user group
 - intend to manage diversity data (mainly from life sciences and geosciences)
 - are ready to invest time in professional data curation
 - intend to keep authority over their high quality data for a long time

Technical documentation for the core applications and rich clients

Name of the database framework	Diversity Workbench (DWB)
DWB contact persons	T. Weibulat, D. Triebel at the SNSB IT Center ↗
Operating system server	MS Windows Server 2008 R2, 2012 R2
Database system	MS SQL-Server 2008 R2 to MS SQL-Server 2014 ↗
Clients	C# desktop applications (local clients) (and web APIs for various projects)
Operating system local clients	MS Windows XP (not recommended), MS Windows 7 to MS Windows 10
GIS functionalities	GIS-Editor , management of geometry and geography data
GUIs for data import	Import-Wizards, txt, CSV, xml in various schemes, xml/xslt, shapes in ESRI-Format
GUIs for data export/ reports	Export-Wizards, txt, CSV, xml in various schemes, xml/xslt, shapes in ESRI-Format
GUI language	default: english (multilingual through translation tables)
Open access	DWB software download
Open source	DWB SVN code repository ↗ , DiversityMobile GitHub repository ↗
Licenses	GPL v.2
Information models online	DWB data models
State of development	since 1999, ongoing
Code language, developer platform	C#, .Net Framework 3.5
User manuals	under DWB user manuals and with the download of the respective applications in the DWB Wiki
Training	DWB workshops ↗ for users and database administrators since 2007

DWB – Data management services

Focus: Providing structured and FAIR data

Services for all DWB users include:

- own and hosted content (DWB cloud services)
 - terminologies
 - vocabularies
 - taxonomies
 - gazetteers
- access to consume external services
 - terminologies
 - vocabularies
 - taxonomies
 - gazetteers

DWB rich clients allow for data ingest via web services

Users of DWB Rich Clients (e.g., DC, DD, DP, DR, DSP, DTN) are able to directly consume a number of web services (up to now: nine web services with taxon names, taxonomies and hierarchical classification, three with geoinformation, one with fossil terminologies, one with literature information and one with information on provenience of digital objects). Seven are provided by the GFBio Terminology Service.

The features to enrich DWB data by using external global authoritative resources is supplied by the DWB cloud services established at the SNSB and curated by the DWB user community.

List of web services connected

- Catalogue of Life [with CoL WS](#) (service permanently offline; service provider is reorganising the service)
- EU-nomen: Pan-European Species directories Infrastructure [with PESI NameService](#)
- GBIF API [with GBIF Species API](#)
- GFBio Terminology Service Widgets [with gfbioEnvironmentOntology](#)
- GFBio Terminology Service Widgets [with gfbioGeonames](#)
- GFBio Terminology Service Widgets [with gfbioIsoCountries](#)
- GFBio Terminology Service Widgets [with gfbioKingdom](#)
- GFBio Terminology Service Widgets [with gfbioProkaryoticNomenclature](#)
- GFBio Terminology Service Widgets [with gfbioRecordbasis](#)
- GFBio Terminology Service Widgets [with gfbioWorldSeas](#)
- Index Fungorum [with Index Fungorum WS](#)
- Mycobank [with Mycobank WS](#) (service temporarily offline for technical reason on the provider side)
- The Paleobiology Database [with Gateway to PalaeoDB](#)
- Recent Literature on Lichens RLL [with RLL WS](#)
- Tropicos [with Tropicos WS](#)
- WoRMS [with WoRMS WS](#)

DWB – for anthropology?

Focus: Providing structured and FAIR data

- DWB DiversityCollection (DC) is ready to manage osteological collection data (540 elements in 48 tables)
- DWB DC Table Editor is already used for non-human osteological collections

	Accession number	Collection day	Collection month	Collection year	Country	Locality description	Collector	Accession month

DWB – for anthropology?

Focus: Providing structured and FAIR data

- Anatomical collection of the LMU (in progress)
- Terminologica Anatomica (in progress)

The screenshot displays three windows from the DiversityCollection and DiversityScientificTerms databases. The left window shows a specimen record for ASM-0077 (human hand) with a photograph and a list of related specimens. The middle window shows a photograph of a human hand specimen with anatomical labels. The right window shows a hierarchical tree of anatomical terms, including 'Ossa manus' and 'Ossa Membri Superioris', with a detailed view of the 'Ossa manus' term including its hierarchy, description, and a small image of a hand skeleton.

DWB-DC – Import tools

Focus: Providing structured and FAIR data

- DC Import Wizard is guiding import from excel sheets
- compliant excel templates and import schemes for zoological collections exist (for human osteological collections currently planned together with SNSB-SAPM)

The screenshot displays the DC Import Wizard interface. The main window shows a 'Schedule for import of tab-separated text files into DiversityCollection' with a table of columns and their transformations. The table is as follows:

Column in table	Key	Copy	Pre	Post	File pos.	Transformations	Value	Source	Table
CollectionEventID								Database	
CollectionDay	?				7	Split at Pos. Dir. 1 =>		File	
CollectionMonth	?				7	Split at Pos. Dir. 2 =>		File	
CollectionYear	?				7	Split at Pos. Dir. 3 =>		File	

A smaller window shows an Excel spreadsheet with a 'Specimen Info Metadata' table:

Sample ID	Field ID	Museum ID	Collection Code	Institution Storing

DWB – Rich Clients for data management

The image displays several overlapping windows from the Diversity Workbench (DWB) suite:

- DiversityAgents (v. 3.0.0.3):** Shows a list of agents with columns for Accession number, Collection year, and Agent name. A table lists specimens like SAPM-MA-00125 through SAPM-MA-00132.
- DiversitySamplingPlots (v. 3.0.6.4):** Displays a plot configuration window with fields for Identifier (Schamhaupten), ID (15185), and Type (Steinbruch). It also shows a list of agents and a search criteria panel.
- DiversityDescriptions, Database: DiversityDescriptions_GFBIO (v. 3.0.1.9):** Shows a query results window for project DSMZbacdivedesc, listing various bacterial strains and their descriptions.
- DiversityProjects, Database: DiversityProjects_GFBIO (v. 4.1.4.7):** Displays a detailed view of a project (ID: 967) titled 'Mobilisation of data for GFBio services - Bacterial Descriptions Use Case'. It includes a description, notes, and a list of agents involved in the project.

DiversityDescriptions (DD) for matrix data

DWB-DD with open schema (EAV model): User is designing his/her own data structure.

→ Descriptors, characters, properties, traits; descriptor states (categorical, text), values (measurements), entity/items store item data

Matrix

Triple

I_ID	Item	D_ID	Descriptor	V_ID	Value

Triple

I_ID	D_ID	V_ID

Alternative import formats:
DELTA and SDD

Triples:

- > item-descriptor-state
- > item-character-state
- > entity-attribute-value
- > element-property-value

DWB – in GFBio

- GFBio recommended
- GFBio helpdesk with advice for data management in DWB
- GFBio is hosting DWB environments for GFBio user (under development)

Tools & Workbenches for Data Management

GFBio supports researchers with software for data management. Two German developer groups ([Diversity Workbench \(DWB\)](#) and [BEXIS](#)) providing open source platforms for biodiversity data management extend their applications in the active phase of research projects will facilitate via the GFBio portal.

Online Workshop – Programm

41st Diversity Workbench Workshop:

27./28.04.2021

Arbeitsprogramm

27. April 2021

- 10.00 Uhr Begrüßung und Hinweise zum Einsatz von ZOOM (D. Triebel, T. Weibulat)
- 10.05 Uhr Vortrag: Diversity Workbench – Einführung (D. Triebel)
- 10.30 Uhr Live-Demo: Überblick über Grundfunktionen von Diversity Workbench (DWB) und DiversityCollection (DWB-DC), Beispiele (M. Weiss)
- 11.15 Uhr Vortrag: DWB Workshop Datenbanken und Trainingsserver (A. Link); siehe auch DWB Trainingsumgebung
- 11.30 Uhr **Selbständiges Arbeiten** mit DWB-DC: Anlegen von Daten, Grundfunktionen (Anleitung T. Weibulat, unterstützt von A. Link, W. Reichert, M. Weiss)
- 12.30 Uhr Mittagspause
- 13.25 Uhr ZOOM-Gruppenbild
- 13.30 Uhr Live-Demo: Überblick über Funktionen von DiversityProjects (DWB-DP), DiversityAgents (DWB-DA), DiversityScientificTerms (DWB-DST), Beispiele aus Monitoringprojekten wie der Flora von Bayern (M. Weiss, J. Wellsow)
- 14.15 Uhr **Selbständiges Arbeiten** mit verschiedenen DWB Modulen: Quellen für Daten in DWB-DC (Anleitung T. Weibulat und M. Weiss, unterstützt von A. Link, W. Reichert)
- 15.15 Uhr Kaffeepause
- 15.30 Uhr Vortrag + Live-Demo: AraGes: Überblick über Funktionen von DiversitySamplingPlots und DiversityTaxonNames (H. Höfer, F. Raub)
- 16.00 Uhr Vortrag + Live-Demo: GBOL DNA-Barcoding-Referenzprojekt: DWB-Datenmanagement und Datennetzwerk (P. Grobe)
- 16.30 Uhr Diskussion
- 17.00 Uhr Ende

28. April 2021

- 9.00 Uhr **Selbständiges Arbeiten** mit DWB-DC, Grundfunktionen (Anleitung M. Weiss, unterstützt von A. Link, W. Reichert, T. Weibulat)
- 10.00 Uhr Vortrag + Live-Demo: Flora von Bayern-Initiative: Import von Beobachtungsdaten aus Exceltabellen, Arbeiten mit dem Spreadsheet (M. Ruff, Julia Wellsow)
- 10.45 Uhr Kaffeepause
- 11.15 Uhr Live-Demo: Bayernflora-Editor (J. Wellsow)
- 11.30 Uhr Live-Demo: Bayerische TaxRef-Datenbank (DTN mit RL-Kategorien, LfU Code, Angabe des floristischen Status, Checklist-Infos etc.) und Darstellung der Info im BIB Datenportal (W. Diewald, J. Wellsow)
- 11.45 Uhr Vortrag: Publikation von Beobachtungsdaten über die DWB-BioCASE-Datenpipeline. Daten in GFBio, VAT Tool, GBIF und im Portal der Flora des Böhmerwaldes (T. Weibulat, W. Diewald)
- 12.00 Uhr Live-Demos: Portalfunktionen GBOL, Bayernflora und AraGes, aufbauend auf DWB gemagagten Daten (interaktive Verbreitungskarten, Artenlisten, Statistiken zu Artenzahlen ...)
- 12.30 Uhr Vortrag: NFDI4BioDiversity: Beratung von Artenmonitoringprojekten (N.N. ? M. Friedrichs-Manthey)
- 13.00 Uhr Mittagspause
- 13.45 Uhr Live-Demo: Einsatz von DiversityTaxonNames und Verwendung von Taxonlisten in GBOL (B. Quast)
- 14.00 Uhr Vortrag + Live-Demo: DWB-DTN Datenpipeline, Taxon-Checklist-Daten in GFBio und GBIF: Publikation von taxonomischen Daten, Klassifikationen, RL-Kategorien und Referenz-Codes im DWB-DTN Schema (REST-API) und im DwC Schema (S. Seifert)
- 14.15 Uhr Vortrag + Live Demo: Diversity Workbench als GFBio Service (S. Bingert, A. Link)
- 14.45 Uhr Kaffeepause
- 15.00 Uhr **Selbständiges Arbeiten** mit DWB-DC, spezielle Funktionen (Anleitung M. Weiss, unterstützt von A. Link, W. Reichert, T. Weibulat)
- 16.00 Uhr Live-Demo: Import von Bilddaten mit Bayernflora-Template, DiversityImageInspector (W. Reichert, J. Wellsow)
- 16.15 Uhr Live-Demo: Überblick über Funktionen des DWB GIS Editors (Video, 34 min) (W. Reichert)
- 17.00 Uhr Diskussion und Ende
